

### **David's birthday present**

Today is David's birthday. Tom and Kitty want to buy a present for him.

The children go to Leo Shopping Centre and want to buy toys there. They find a blue toy car at Fun Toy Shop.

Kitty asks, 'How much is this toy car?'

The saleslady says, 'It's fifty-five dollars.'

Tom opens his wallet. He just has fifty dollars. He does not have enough money for the toy car. Then Kitty sees a robot. Tom remembers that David likes robots too.

The saleslady says, 'The robot is fifty dollars. You can buy it!'

Tom and Kitty buy the robot. Then they want to give it to David. However, they can't do it because David's home is too far away.

Suddenly, they see David. David says, 'I am having a birthday party at Star Café in this shopping centre.' He continues, 'Would you like to join my party?' Tom and Kitty say 'Yes!' immediately with joy. Then they give the robot to David.

What a lucky day for the children!
