My dream job

I want to be a lawyer when I grow up. I want to be a lawyer because I think I am smart.

If I become a lawyer, I will represent my clients in the court. I will help people with their legal problems. I will work all day long. I will have a meaningful and happy life too!

Lawyers need to be smart so that they can remember all the laws by heart. They must be calm too so that they can have their own views when they are at the court. They will not be affected by others easily.

I am going to study hard so that I can be a lawyer. I am going to read the newspaper every day so that I can learn to have my own points of view. I will try to do more presentations so that I will be brave and confident.

I hope I can be a lawyer when I grow up. Maybe if you need to go to the court, you can see me or ask me about legal problems one day!
